

Moving Made Easy with Numbers

Moving Label Templates

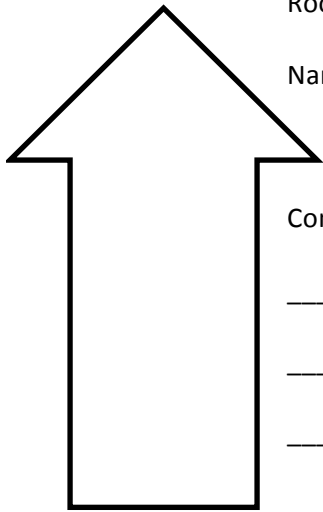

Using room numbers your boxes, furniture, and rooms makes it very quick and easy for friends, family, and movers to identify where to put things...*saving you time and money!*

STEPS FOR NUMBER COORDINATING A MOVE

1. Assign each room a number. Use a marker to write the number in the arrow on the **box labels** (page 2). This will assign the box to the room, as well as indicate which end is up.
2. Complete information on label (at least one per box).
3. Attach one label on each side (5 sides) of each box.
4. Print as many box labels as needed to label each box and piece of furniture.
5. Write the room number in the house on the **room labels** (page 3) with the same number as the arrow on the box labels for that room.
6. At the new house, attach appropriate room label to the door or entry way of each room.
7. Print enough labels to label each room in the house that will receive a box or piece of furniture
8. Print room labels as directional signs, too, to help guide movers to the room (e.g., put an up-arrow for Room #4 - Guest Bedroom at the bottom of the stairs and then post another sign with the page turned to the point the arrow toward the right to indicate the hallway where the room is located).

Notes:

- Be sure to use removable labels as instructed on packages to prevent damage to doors and walls.
- For furniture, cut out the box label keeping the backing on and attach using painter's tape to prevent damage.
- Template created using Avery Label #6464.
- Use Sharpie Markers for best results.
